Subject Index

A

Acetone 384
Acetylcholine 50, 75, 328, 440
Action potential 312
– potential duration 170
– – overshoot 75
Adaptation, potassium 433
Adenosine 66, 75, 141
– A1 receptors 141
– analogues 141
– triphosphate-induced depolarization 112
Adenylate cyclase 170
Aldosterone 186, 236
Alkali metalions 13
Amiloride 115, 377, 433
Amiloride-sensitive, sodium conductance 82
Aminophylline 66
Aminopyridines 353
Ammonia production 229
Amphibian skin 337
Amphotericin B 97, 236
Angiotensin II 220
Anion channel 262
– dependence of electrical effects 175
– exchanger 175
Aortic nerve 422
– nerves 415
Apical cell membrane 446
– membrane 262
– – properties 186
– Na channels 115
– sodium permeability 82
Arterial chemoreceptors 415
– microvascular bifurcations 289
– muscle cells 402
– pressure 21
– – control system 258
Arteries 283
Arteriovenous anastomoses 128
ATP 7, 429
ATPase 440
– activity 210, 449
ATP reversal potential 112
Atrial fibers 312
Atropine 164, 66
Autofluorescence 47
Autonomic effectors 21
Autoregulation 283
Axonal connections 58

B

Ba^{2+} 120, 429
Barium 175, 236, 353, 360
Barium-sensitive potassium 82
Baroreflex 258
– control 21
Basolateral sodium permeability 82
Bicarbonate 175
– sodium cotransport 175
Bifurcations 289
Blood flow 128, 283
Bohr effects blood and erythrocytic 7
Brain cooling 55
Bronchial blood flow 384

C

Ca concentration 360
Ca-dependent current 353
Ca reabsorptive capacity 28
Ca^{2+}-activated K^+-channels 120
Ca^{2+} channel blockade 222
Ca^{2+} concentration 210
Ca^{2+}-exchange 266
Ca^{2+} fluxes 222
Ca^{2+} influx 312
Cadmium 353
Caecum 278
Calcitonin 28
Calcitriol 151
Calcium 328, 360
– activated force development 136
– antagonist D600 225
– channel 170
– currents 360
– permeability 429
cAMP 170, 312
– mediated secretion 446
Capsaicin 170
Carbachol 266
Carbonic anhydrase 344
Carboxyl groups 13
Cardiac enlargement 296
– work load 296
Carotid artery 128
– sinus 415
– – nerve 422
– – nerves 258
Catecholamines 312
Cation permeability 82
Cell culture 175
– dissociation 105
– membrane 388, 446
– – water permeability 301
Cerebellum 55
Cerebral blood flow 283
Cerebrovascular resistance 283
Cerebrum, middle cerebral artery 402
Cesium 75
cGMP 312
Channel block 120
Chemoafferent stimulation 422
Chemoreceptor afferents 415
Chloride conductance 337
– current 328
– specific pathway 337
Cholera toxin 170
2-chloroadenosine 66
Chromaffin cells 360
Chronic metabolic acidosis 229
Chronotropy 66
Circle of Willis 283
Cl-conductance 175
Cl^--channels 446
Cl^--secretion 446
Cl^--secretory epithelium (MDCK) 262
Cl^- sensitive microelectrodes 331
^{36}Cl fluxes 50
Co_2 effect 7
Cobalt 353
Colon 82, 236, 433
– in vitro 186, 278
Comparative physiology 35
Contraction 215
Cooling of brain 55
Core temperatures 55
Corneal endothelial cells 175
– endothelium 377
Crossbridge kinetics 136
Cultured corneal endothelial cells 175
Current injection 388
– voltage 186
Cyclopropane 384

D

DC-tape recorder 324
Dead space 384
Decerebrate cat 245
Deep body temperature 55
Defecation reflex 164
Denervation 407
– natriuresis 146
Deoxysugars 296
Depolarisation 360
Depolarization 112
Dexamethasone 186
DIDS 50
Diaphragm fibres 1
Diastolic potential 75
Dietary potassium loading 433
Diffusion potentials 156
Diuretics 337
Double cable tubule 388

E

EGTA 328
Electrical analog signals (DC to 20 kHz) 324
Electrically controlled thermode 273
Electrical potential difference 278
– properties 278
– –, muscle fiber 197
– stimulation 415, 422
Electrogenic (Na^+/K^+) pump 1
– Na-transport 186
Electrolytes 205
Electromagnetic blood flow measurement 220
Electron microprobe analysis 205
– microscopy 369
Electrophysiology 105, 318
Embryonic chick sensory neurons 170
Endothelial cells 175
Endurance training 369
Enterocytes 151
Enzymatic cyclic method 229
Epithelial Na:K pump 236
Epithelium 262

Erythrocyte pH 7
Erythrocytes 344
Ethane 384
Ether 384
Excitation-contraction coupling 312
Exercise 193
–, chronic 296
Exertion 296
Expiration 415
Extensor motoneurons 245

F

Fluothane 384
Force 210
Force development 402
– of contraction 266
– recovery 136
– response 136
Forskolin 141
Frequency of vasomotion changes 289
Functional residual volume 422
Furosemide 50, 175

G

Gallbladder epithelium 301
Gangliosides 1
Garter snakes (Thamnophis spp.) 35
Gastric surface cells 331
Glucagon 28
L-Glutamine 229
Glutamine metabolism 229
Goldman-Hodgkin-Katz equations 186
Guanethidine 164

H

Haemolysis 344
Head rotation 245
Heart 105
– cell segments 225
Hematocrit distributing 396
Hemodynamics 396
Hemoglobin-oxygen saturation 7
Hemorrhage 258
Henle's loop 28
Heterogenous epithelia 47
Hill coefficient 7
Hindlimb extensor motoneurons 245
Histochemistry 369
Human heart cell segments 225
– monocytes and peritoneal macrophages 27
– muscle 348
– teeth 273
Hydraulic permeability 156
5-Hydroxytryptamine 128
Hypercapnia 283
Hyperpolarization 75, 109, 175
Hypertension sympathetic 21
Hypotension 283
Hypoxia 1

I

Indacrinone (MK-196) 337
Inert gases 384
Inhibition, adrenergic and nonadrenergic 429
Input impedance 308
Inspiration 415, 422
–, termination of 58
Instruments and techniques 105, 324
Intense exercise 193
Intercalated cells 47
– disc 225
Intercellular space 301
Intestinal smooth muscle cells 429
Intracellular cAMP 141
– electrolytes 205
– lipid 369
– Na^+-ion activity 266
– perfusion 225
– potentials 175
– sodium 82
Intracranial chemosensitivity 415
Inverted microscope 318
Ionic currents 407
Ionophore 90
Isolated enterocytes 151
– heart cell 105, 318
– olfactory cortex 141
– perfused rat hearts 296
– renal tubules 35
– SA node 66
– turtle colon 236
Isometric force 215
– tension 449
– twitch potentiation 348
Isotonic fluid reabsorption 90, 97
– shortening 210
– – velocity 215
– water absorption 301

K

K channel 353
K concentration 353
K channels 170
K^+channel 41
K^+-channel 446
K concentration 353
K^+ conductance 402
K^+ current 312
K^+ depolarization 222
K ionophore 90
K outward currents 312
K pump 50
Kidney, distal segment 28
–, proximal tubule 156
–, snake 35
–, tubular transport 388
– excretion 146
– proximal tubule 90

L

Labyrinth receptors 245
Lacrimal gland 328
Lactate 193
Large intestinal electrolyte transport 278
Lateral intercellular space 301
Leukocyte plugging 396
– rheology 396
Lithium permeability 82
Locke solution 440
Lumbar colonic efferent discharge 164
Lung volume 415

M

Magnesium 360
Mannitogap technique 407
Mannitolsaline volume expansion 205
Medulla oblongata 55
Medullary respiratory-related neurons 58
Membrane capacitance 197, 225
– conductance 109, 112
– currents 170
– permeability 331
– potential 1, 41, 402
– sodium channels 225
Metabolic acidosis 229
Methyl esters of cisvaccine acid 151
Mg reabsorption 28
Microcirculation 289, 396
Microdissected rat nephron segments 229
Microelectrode recording 66
Microelectrodes 433
Microprocessor 105
Micropuncture 97
– techniques 146
Microscopy, high-magnification 27
Microspheres 128
Microvascular bed 396
Microvascular bifurcations 289
Miniature end-plate potentials 1
Mitochondria 193, 369
Mitochondria-rich cells 47, 337
Mn^{2+} 429
Morphometry 369
Motoneurons 245
Motor nerves 422
Muscarinic receptor 266
Muscle 308, 407
– biopsy 369
– cells 429
– contraction 193
– fiber types 369
– fibres 449
– metabolism 193
Myocardial contractility 21
– muscle layers 296
Myocardium 66, 222
Myometrium 215
Myosin light chain 210, 215, 348

N

Na efflux 115
Na in toad skin 115
Na^+ channels 407
Na^+-entry into corneal endothelium 377
Na^+-ion activity 266
$(Na^+ + K^+)$-activated ATPase 440
(Na^+/K^+) pump 1
Na:K pump 236
Na^+ transport 377
Na-K-ATPase 90
Na-K-Cl cotransport system 50
Na permeability, colon 82
Na pump 205
Na reversal potential 109
Na-transport 186, 278

NADH 193
Natriuresis 146
Natriuretic mechanisms 205
Necturus gallbladder epithelium 301
– gastric surface cells 331
Negative chronotropy 66
Nephron heterogeneity 156
– segments 229
Nernst equation 186
Network model 396
Neuromuscular preparation 1
Neurones of Aplysia californica 353
Neurons, cultured 360
Node of Ranvier 13
Nonadrenergic transmission 429
Non-cycling crossbridges 210
Noradrenaline 109, 429
Norepinephrine 170
Normocapnia 283

O

O_2 affinity 7
Oesophageal pressure 415
Olfactory cortex 141
Oocytes 41
Open-loop gain 258
Ophthalmic artery 283
Organic anions 175
Ouabain 75
Outer barrier sodium permeability 115
Ovarian oocytes 41
Oxygen equilibrium (Bohr effect) 7

P

P-chloromercuribenzoate (PCMB) 115
P-light chain phosphorylation 348
Pacemaker shift 66, 75
Papillary muscle 266
Parietal cells 47
Passive electrical properties 197
Patch clamp 27
– – method 446
Patchclamp 120
Patch-clamp 262
– current recording 328
PCO_2 402
Peak LV dP/dt 21
Pelvic afferent reflex control 164
– – stimulation 164
Perfusion chamber 318
– ratio 384
Peripheral nerve 13
pH 402
– stat method 344
Phasic tension 312
Phenylalanine 296
Pheripheral vascular termination 308
Phosphate fluxes 151
– (P_i) transport 151
Phosphorylation 210, 215, 348
Phrenic nerve 422
Pneumotaxic centre 58
Pons 164
Pontine afferents 58
– sympatho-inhibitory region 164
Positive inotropic effect 266
Postjunctional excitation 429
Potassium channels 41, 433
– conductance 75, 82
– current 170, 353
– depolarization 222
– loading 433
– permeability 90
– secretion 433
Potassium-selective microelectrodes 433
Potassium transport 433, 440
Potential 278
Power spectrum 289
Protein synthesis 296
Proximal colonic parts 278
– convoluted tubule 156
– tubular membrane 90
– – transport 146
– tubule cellular 205
– – of rat 97
PTH 28
Pulp temperature 273
Pulse code modulation 324

R

Radial compression 136
Raffinose 156
Rapid transients 136
Rectal gland 446
– motility 164
Recurrent inhibition 245
Redox-state 193
Regulatory myosin light chain 210
Renal blood flow 220
– brush border membranes 97
– clearance 146
– denervation 146
– proximal tubule 388
– tubule, snake 35
Renshaw cells 245
Resistance 388
Respiration 415, 422
Respirators 105
Respiratory centres 422
– muscles 422
– nerves and muscles 422
Respiratory-related neurons 58
Resting membrane potential 1
Rolipram 141

S

Salivary acinar cells 50
– secretion 440
Sarcolemma 266
Secretory flow rate 440
Sensory neurones 360
– neurons 170
Short circuit current 236, 278
– communication 225
Short-term intense exercise 193
Shunt pathway 337
SITS 35
Silicon diodes chronically implanted 55
Single cells 27
– skeletal muscle fibers 197
Sinoatrial node 66
Sinus node 75
Sinusoidal stimulation 245
Sinus slowing 75
Skeletal muscle 193, 308, 348, 407
– – fibers 197
Skin fold window preparation 289
Skinned muscle fibres 449
– smooth muscle 210
Slow inward current 312
Smooth muscle 109, 210, 215
– – cell membranes 120
– – – pacemakers 289
– – cells 429
Sodium 175
– antiport 97
– channels 13, 433
– currents 225
– depleted rats 146
– entry into cell 90
– excretion 146
– permeability 115
– permeability 97, 236
– pump 1
– transport chloride conductance 337
Stomach 331
Streaming potentials 156
Submandibular acini 50
– glands 440
Sucrose-gap method 112
Supraspinal center 164
Sympathetic effector mechanisms 21
– activity 164
Synaptic transmission 141

T

Taenia coli 210
TEA 41, 120, 353, 407
Teeth 273
Teflon culture dish 27
Temperature 440
– acclimation 449
– measurement 55
– regulation 318
Tension generation 449
Tetraethylammonium 353
– chloride 433
Tetrodotoxin (TTX) 13
Theophylline 141
Thermode 273
Thermostimulation 273
Thyroidectomized rats 90
Thyroid hormones 97
"tight" epithelium 82
Tissue blood flow 128
– conductance 278
– culture 105
Tonic tension 312
Trabeculae from rat heart 136
Transepithelial Na efflux 115
Transport inhibitors 50
Transvaccinic acid 151
Tri-iodothyronine 90
Trimethyloxonium ions 13
– – (TMO) 13
Trituration 105
TTX 429
TTX-resistant Na^+ channels 407
Tubular epithelia 388
Twitch potentiation 348

U

Ultramicro-assay of ammonia 229
Unindirectional ^{24}NA flux 115
Unstirred layer 156
Urate transport 35
Urinary excretion of sodium 146
Uterine smooth muscle 215

V

Vagal effector mechanisms 21
Vagally mediated baroreflex 258
Vagus 21
Valinomycin 90
Vascular compliance 308
– termination 308
Vas deferens 109, 112
Vasomotion 289
Vasopressin 28
Ventilation 384, 415
Ventilatory responses 415
Verapamil 222
Vessel occluder 220
Vestibulospinal influences 245
Video time-lapse microscopy 27
Vitamin D 151
– – deficient rats 151
Voltage clamp 407
Voltage-clamp pulses 353
Voltage-dependent anion channel 262
Voltage dependent capacitance 197
Voltage-dependent K^+ channel 41
Voltage divider ratio 388
Volume expansion 205
– reabsorption 97

W

Water permeability 301
White blood cell 396
